SKILLS

- Python
- Data Structures
- OOPS
- C Programming
- Web Development

LANGUAGES

- English
- Hindi

ABOUT ME

I am **SaiAnirudh Gaddam**, a Computer Science Engineering student passionate about building modern, user-friendly web applications. I specialize in front-end development using React.js and have a strong foundation in Python, Data Structures, and Object-Oriented Programming (OOPs). I focus on creating clean, responsive, and efficient solutions.

PROJECTS

Bus Reservation System

Designed and developed a user-friendly Bus Reservation System webpage using HTML, CSS, and JavaScript. Enabled users to search buses, check seat availability, and book tickets efficiently. Focused on responsive design and smooth user experience for both desktop and mobile users.

Cartoonifying Image

Cartoonifying images is an engaging technique in image processing that transforms real-world images into cartoon-like representations by simplifying colors and enhancing edges. This project explores the use of K-Means clustering for color quantization and edge detection techniques to achieve a cartoon-like effect.

Budget Tracker

A Budget Tracker is a simple application that helps users monitor income and expenses, categorize spending, and maintain better financial control.

EDUCATION

SR University	2023 - 2027
Bachelor of Technology CSE	
Alphores Junior College	2021 - 2023
Intermediate	
Little Flower High School	2020 - 2021
10th	

CERTIFICATIONS

- Data Analytics Essentials** | Cisco Networking Academy
- Complete UNIX & Linux OS Fundamentals Training** | Infosys
- Computer Communications and Networks** | Saylor Academy
- AIML Virtual Internship** | AICTE
